APPROVED

PURPOSE

To obtain major performance enhancements by implementing
new Operating System, Version 2.0.

* Extensive multiple   simultaneous file access
  file handling   and multiple use capacity

* RS232C port   interface a wide range of
                                peripherals direct to the
                                POLY 1 console.

* User password file   protect files against
  protection   access by other users

* Extensive error check   improved reliability
  routines

* New, improved utilities   more powerful instruction
                                set, enhanced ease of use

* Improved arithmetic   faster, more efficient
  operations
